Fire procedure

What to do...if a fire breaks out

There is a very slim chance that you will witness a fire in a hotel such as this one because of the modern smoke and fire alarm system. However, as a safety precaution, we have compiled a few points that you may make yourself familiar with while lodging with us Best Western Plus Yenagoa.

Find the fire extinguishers

Familiarize yourself with your surroundings. At each end of the corridor, there are fire escape stairs. On each floor, we have multiple fire extinguishers and water hoses placed behind demarcated firefighting signs easily accessible to anyone.

Do Not Panic!...Do not rush or run!...Notify Calmly!

In case of a fire evacuation, please calmly make your way to the fire exit staircase. It is important that you use the fire staircase and please do not run or try to take three stairs in one step. Those with experience in emergency situations kindly assist others in the process.

Switch your air conditioner off

Smoke travels through air vents. Long Smoke is by far the greater enemy at any given point and will incapacitate actions. Therefore it is important that you switch off the air systems before vacating the room to assist us in fighting the fire.

Assemble in the car park demarcated fire assembly point

The duty manager and his team will clear each and every floor according to our guest list, marking each vacated room with a cross on the door. We will hold a roll call outside at the demarcated assembly point to make sure we are not missing anyone.

Smoke enters your room from the corridor or air vent

Feel the door. In case the door is hot, **Wet all available towels** and stuff them under the door - **Shut off the air conditioner** immediately - **Stuff the air vent with wet blankets** and sheets - **Fill your bathtub** with water.

- **Use the ice bucket** to splash water against the door - **Phone 2000 or 2002**

Signal your presence at

the window for assistance from the firefighters.
